Sarah,  
sorry I didn't respond earlier. I was gone over the weekend and at a meeting today. I did not succeed in finding someone to present the MTBE case. Bill Jennings might make it, and if so, will take over. Otherwise, please discuss the issue without me. Please make a note of one little change in the data sheet: the EPA recommended limit is now 20-40 micro gram/L.  
Thanks. Good luck for a successful meeting!  
Inge
